

# Microsoft Teams: how it works

- Microsoft Teams is a flexible and customizable collaborative platform;
- Integrates video conferencing, file storage and transfer, and a notepad;
- Includes instant messaging for team or workgroup exchanges;
- Archiving of all exchanges;
- Integration with Microsoft Outlook for email and calendar use;
- Microsoft software available on its own or through Office 365.

## Packages adapted to your needs

- « Microsoft 365 Business Voice » plan is based on a per-user model. It starts at \$34.95 per month and includes:
  - ✓ 1 phone channel (incoming and outgoing calls).
  - ✓ 1 phone channel (incoming calls).
  - ✓ The automated receptionist.
  - ✓ 3 "Additional Microsoft Teams extension".
  - ✓ Unlimited Canadian long distance.
- Important : each user must have a Microsoft Teams "Business Voice" license without a call plan.
